## WIX Racing Oil Filters

WIX provides two very different and distinct racing filters – **Advanced Performance Filters (T-10)** and **High Efficiency Endurance Filters (T-71)**.

**Advanced Performance Oil Filters** use a media (T-10) that is rated at a Frazier air flow of approximately 267 CFM and is wire-backed. The unique wire-backing provides a very stable base for a media blend of fiberglass, polyester and cellulose. This media is resistant to high temperatures and water levels in the oil that can plug standard media types. Our **Advanced Performance media (T-10)** is designed to provide a positive oil flow with low restriction (*see chart, next page*).

### WIX Advanced Performance (T-10) Oil Filter Part Numbers are:

**\*51268      57003R\*      57007R\***

*\*Remote Mount Adapters Are Required (see pages 7 & 9).*

#### Additional Oil Filter Features Include:

- A. Heavy-walled can and cover to withstand the extreme burst pressures (up to 500 psi).
- B. High temperature nitrile components (up to 300°F)...Anti-drainback valve (when included) and base plate gaskets to withstand extremely high racing temperatures.
- C. Zinc chromate plated base plate...Low surface friction and corrosion-free.
- D. Spiral wound center tube provides increased collapse pressure and enhanced flow pattern.
- E. Metal end caps provide element strength and prevent filtering bypass.
- F. Individually sealed to protect against contamination by environmental dust or dirt.

These are the WIX recommended oil filters for maximum horsepower increase, to be used primarily on concrete or asphalt tracks.

**For optimum performance, use our  
Advanced Performance Oil Filters with our  
Advanced Performance Air Filters.**

# WIX Racing Oil Filters

**High Efficiency Endurance Oil Filters** use a media (T-71) rated at a Frazier air flow of approximately 75 CFR. This media contains a higher resin content than our **Advanced Performance Filters** to trap and hold smaller contaminants and provide higher efficiency.

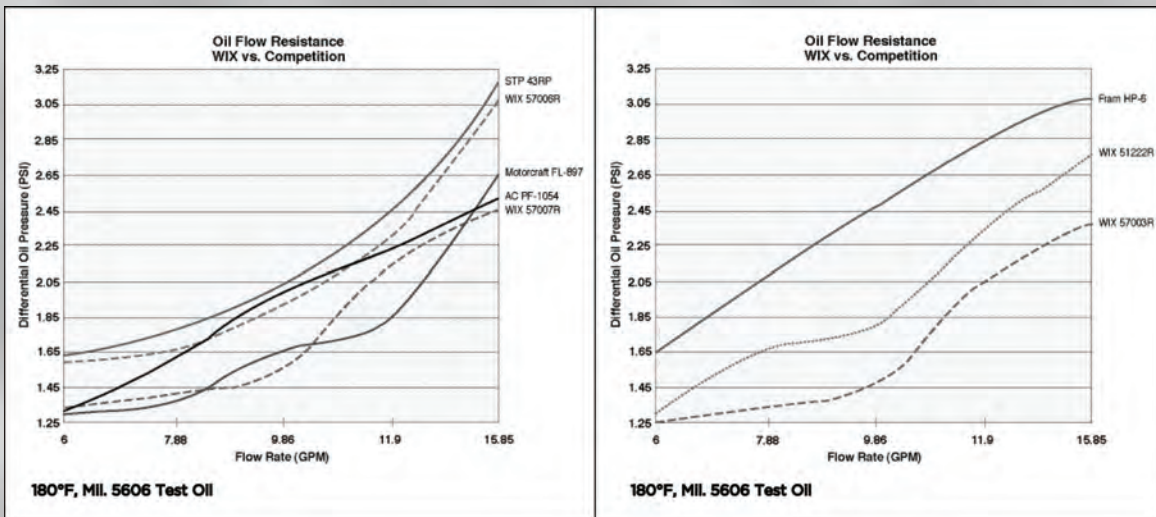

Our **High Efficiency Endurance Filters** also include the same component features as the **Advanced Performance Filters**: high burst pressure can, high temperature rubber components, zinc chromate base plate, metal end caps and spiral center tubes.

## WIX High Efficiency Endurance (T-71) Oil Filter Part Numbers are:

**51060R    51061R    51069R    51222R    51515R    51794R**

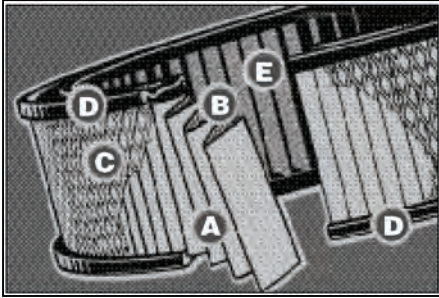

These are the WIX recommended oil filters for better efficiency needed on dirt, clay or off-road tracks.

**For better protection, use our High Efficiency Endurance Oil Filters with our High Efficiency Endurance Air Filters.**

**CAUTION: Not intended for street use.**

# WIX Racing Air Filters

**Advanced Performance Air Filters** use a unique patent-pending design. Our wire-backed gauze **Reemay®** media (**T-66**) allows maximum air flow while minimizing restriction to boost horsepower. With a Frazier air flow of approximately 410 CFM, these air filters have the lowest restriction of any racing filter available (see *chart, next page*).

## WIX Advanced Performance (T-66) Air Filter Part Numbers are:

46940R	46944R	46945R	46948R	46949R
46941R	46928R	46974R	46927R	46926R

### Additional Air Filter Features Include:

- A. High performance media is designed to provide increased air flow.
- B. Wire mesh gauze media support (when included) contributes to rigid filter construction by assuring consistently stable pleats at high air flow volumes.
- C. Outer screen of expanded metal protects the filter media and supports the filter assembly.
- D. Molded plastisol top and bottom assures a positive seal between the filter and the air intake housing.
- E. Inner screen of epoxy-coated steel wire withstands corrosion and insures stability of the filter element.

These are the WIX recommended air filters for *maximum horsepower increase* used primarily on concrete or asphalt tracks of Nextel Cup, Busch, SuperTruck or ARCA.

**For optimum performance, use our  
Advanced Performance Air Filters with our  
Advanced Performance Oil Filters.**

# WIX Racing Air Filters

**High Efficiency Endurance Air Filters** use a media (**T-88**) specifically developed to filter out harmful contaminants while providing low restriction. With a Frazier air flow of approximately 73 CFM, this is an ideal air filter for the Late Model, Sportsman and Modified racers who run primarily on dirt tracks.

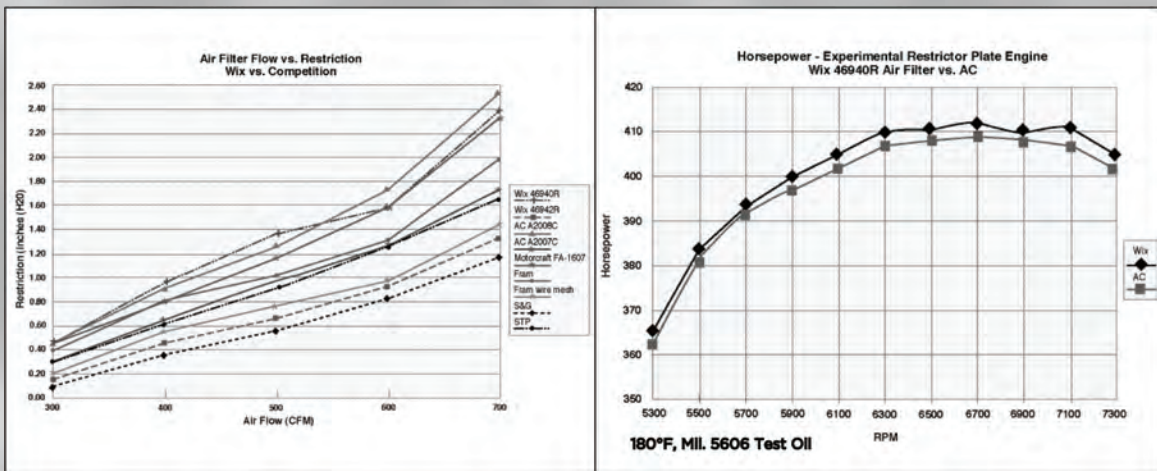

Our **High Efficiency Endurance Air Filters** also share the same exclusive component features as the **Advanced Performance Air Filters**.

## WIX High Efficiency Endurance (T-88) Air Filter Part Numbers are:

**42095R      42096R      46946R**

These are the WIX recommended air filters for better efficiency needed on dirt, clay or off-road tracks.

**For better protection, use our High Efficiency Endurance Air Filters with our High Efficiency Endurance Oil Filters.**

**CAUTION: Not intended for street use.**

The buyer assumes all risks related to the use of this product. New vehicle and equipment warranties are voided when this product is used in competitive racing or modified high performance engines.

# Filtres à huile Racing WIX

WIX propose deux types de filtres différents et distincts à utiliser pour les compétitions : les **filtres à performances élevées (T-10)** et les filtres **d'endurance à haute efficacité (T-71)**.

Les **filtres à huile à performances élevées** utilisent un matériau (T-10) procurant un débit d'air de Frazier d'environ 7,56 m<sup>3</sup>/min (267 pi<sup>3</sup>/min) et possèdent un renfort arrière métallique. Ce renfort unique fournit une base très stable pour le matériau qui est un mélange de fibre de verre, de polyester et de cellulose. Ce matériau résiste aux hautes températures et aux grandes quantités d'eau dans l'huile qui peuvent colmater les matériaux ordinaires. Le **matériau à performances élevées (T-10)** de notre filtre est conçu pour fournir un bon débit d'huile tout en limitant le colmatage (voir le tableau de la page suivante).

## Numéros de pièce des filtres à huile à performances élevées (T-10)

**\*51268**

**57003R\***

**57007R\***

*\* Nécessite un adaptateur de montage à distance (voir pages 7 et 9).*

### Autres caractéristiques des filtres à huile

- A. Boîtier et couvercle à paroi épaisse pour résister aux fortes pressions d'éclatement, jusqu'à 3 450 kPa (500 lb/po<sup>2</sup>).
- B. Pièces en nitrile hautes températures, jusqu'à 148 °C (300 °F) : joints de soupape antirefoulement (le cas échéant) et de plaque de base résistant aux hautes températures se produisant lors des compétitions.
- C. Plaque de base galvanisée au chromate de zinc : peu de frottement superficiel et anticorrosion.
- D. Tube central en spirale pour augmenter la pression d'écrasement et le débit.
- E. Capuchons en métal pour renforcer la cartouche et éviter toute dérivation de la filtration.
- F. Joint hermétique individuel pour éviter la contamination due à la poussière ou à la saleté du milieu environnant.

Ce sont les filtres à huile recommandés par WIX pour obtenir le maximum de puissance, en particulier sur les pistes en béton ou asphaltées.

**Pour obtenir des performances optimales, utilisez nos filtres à huile à performances élevées avec nos filtres à air à performances élevées.**

# Filtres à huile Racing WIX

Les **filtres à huile d'endurance à haute efficacité** utilisent un matériau (T-71) procurant un débit d'air de Frazier d'environ 2,12 m<sup>3</sup>/min (75 pi<sup>3</sup>/min). Ce matériau contient une teneur en résine plus élevée que celle de nos **filtres à performances élevées** pour mieux capturer et retenir les plus petites impuretés tout en étant plus efficaces.

Nos **filtres d'endurance à haute efficacité** possèdent des pièces de mêmes caractéristiques que celles des **filtres à performances élevées** : boîtier à haute résistance contre l'éclatement, pièces en caoutchouc hautes températures, plaque de base au chromate de zinc, capuchons en métal et tubes centraux en spirale.

## Numéros de pièce des filtres à huile d'endurance à haute efficacité (T-71) WIX

**51060R**

**51061R**

**51069R**

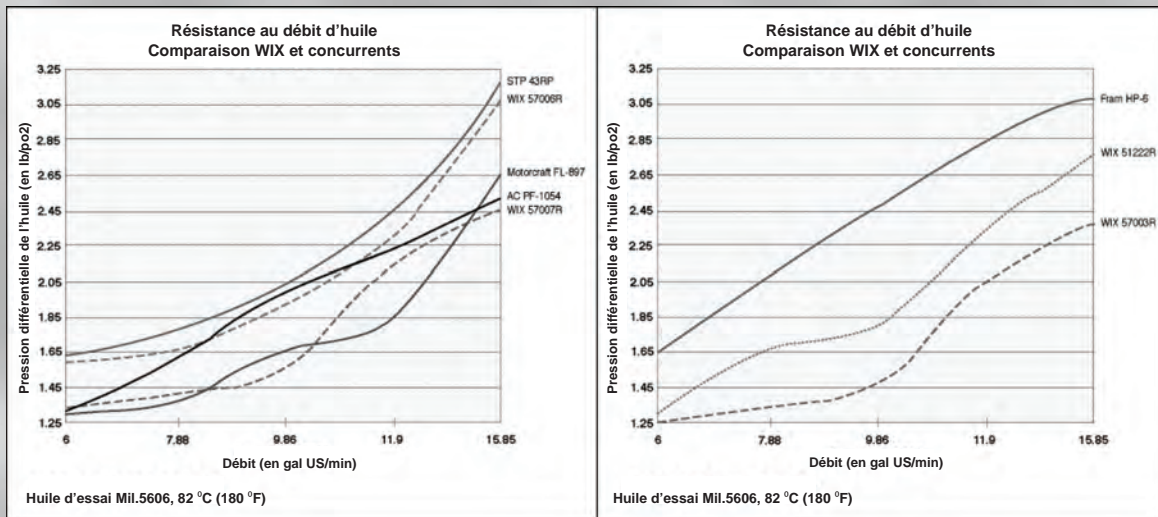

**51222R**

**51515R**

**51794R**

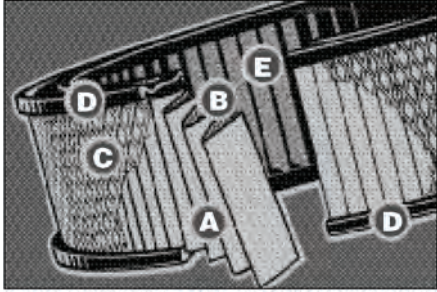

Ce sont les filtres à huile recommandés par WIX pour améliorer l'efficacité requise sur les pistes cendrées, en terre battue ou en tous terrains.

**Pour améliorer la protection, utilisez nos filtres à huile d'endurance à haute efficacité avec nos filtres à air d'endurance à haute efficacité.**

**MISE EN GARDE : Pas pour la conduite en ville.**

## Filtres à air Racing WIX

Les **filtres à air à performances élevées** utilisent une conception unique, à brevet en instance. Notre matériau **Reemay<sup>MD</sup>** en gaze à renfort arrière métallique (**T-66**) permet un débit d'air maximal tout en minimisant le colmatage afin de renforcer la puissance. Avec un débit d'air de Frazier d'environ 11,6 m<sup>3</sup>/min (410 pi<sup>3</sup>/min), ces filtres à air ont le degré de colmatage le plus faible de tous les filtres pour compétitions concurrents (voir le tableau de la page suivante).

### Numéros de pièce des filtres à air à performances élevées (T-66) WIX

<b>46940R</b>	<b>46944R</b>	<b>46945R</b>	<b>46948R</b>	<b>46949R</b>
<b>46941R</b>	<b>46928R</b>	<b>46974R</b>	<b>46927R</b>	<b>46926R</b>

### Autres caractéristiques des filtres à air

- A. Le matériau hautes performances est conçu pour obtenir un meilleur débit d'air.
- B. Le support de matériau en gaze à maille en métal (le cas échéant) contribue à renforcer le filtre en garantissant des plis restant toujours stables même à grand débit d'air.
- C. Le tamis extérieur en métal déployé protège le matériau du filtre et soutient le filtre.
- D. Les parties supérieure et inférieure en plastisol moulé garantissent un joint hermétique entre le filtre et le boîtier d'admission d'air.
- E. Le tamis intérieur en acier enduit d'époxyde résiste à la corrosion et garantit une bonne stabilité de la cartouche du filtre.

Ce sont les filtres à air recommandés par WIX pour augmenter au maximum la puissance sur les pistes en béton ou asphaltées de Nextel Cup, Busch, Super Truck ou ARCA.

**Pour obtenir des performances optimales, utilisez nos filtres à air à performances élevées avec nos filtres à huile à performances élevées.**

# Factres à air Racing WIX

Les **factres à air d'endurance à haute efficacité** utilisent un matériau (**T-88**) spécialement conçu pour filtrer les impuretés dangereuses tout en procurant un colmatage faible. Avec un débit d'air de Frazier d'environ 2,07 m<sup>3</sup>/min (73 pi<sup>3</sup>/min), c'est le filtre à air idéal pour les véhicules de course derniers modèles, sports et modifiés utilisés principalement sur les pistes en terre battue.

Nos **factres à air d'endurance à haute efficacité** possèdent les mêmes caractéristiques exclusives que les **factres à air à performances élevées**.

## Numéros de pièce des factres à air d'endurance à haute efficacité (T-88) WIX

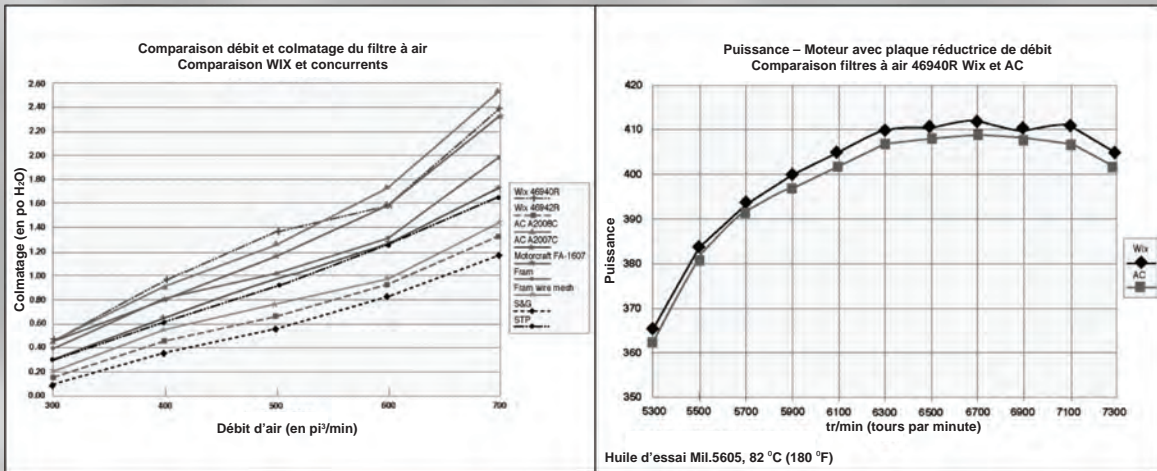

**42095R**

**42096R**

**46946R**

Ce sont les factres à air recommandés par WIX pour améliorer l'efficacité requise sur les pistes cendrées, en terre battue ou en tous terrains.

Pour améliorer la protection, utilisez nos factres à air d'endurance à haute efficacité avec nos factres à huile d'endurance à haute efficacité.

**MISE EN GARDE : Pas pour la conduite en ville.**

## Filtros de aceite Racing WIX

WIX proporciona dos filtros muy diferentes y definidos para uso en competencias – **Filtros de rendimiento avanzado (T 10)** y **Filtros de alta eficiencia y resistencia (T 71)**.

Los **filtros de aceite de rendimiento avanzado** usan un medio (T 10) que está clasificado con una eficiencia de flujo de aire Frazier de aproximadamente 7,56 m<sup>3</sup>/min (267 pies<sup>3</sup>/min) y que tiene un refuerzo posterior de alambre. El refuerzo de alambre excepcional proporciona una base muy estable para una mezcla de medio de fibra de vidrio, poliéster y celulosa. Este medio es resistente a altas temperaturas y altos niveles de agua en el aceite que pueden taponar tipos comunes de medios. Nuestro **medio de rendimiento avanzado (T 10)** está diseñado para proporcionar un flujo positivo de aceite con baja restricción (ver la tabla en la página siguiente).

Los números de pieza de los filtros de aceite de rendimiento avanzado (T 10) WIX son:

**\*51268**

**57003R\***

**57007R\***

*\* Requieren adaptadores de montajes remotos (ver las páginas 7 y 9).*

### Las características adicionales del filtro de aceite incluyen:

- A. Lata con paredes altas y cubierta para resistir presiones extremas de rotura (hasta 3447 kPa ó 500 psi).
- B. Componentes de nitrilo para alta temperatura (hasta 148°C ó 300°F) ... Válvula antidrenaje (cuando se incluye) y juntas de placa de base para resistir temperaturas de competencia extremadamente altas.
- C. Placa de base galvanizada con cromato de zinc ... Baja fricción superficial y libre de corrosiones.
- D. Tubo central espiralado para proporcionar mayor presión de colapso y tipo de flujo mejorado.
- E. Tapas de extremo metálicas para proporcionar resistencia en el elemento y evitar desviación de la filtración.
- F. Sellado individualmente para proteger contra la contaminación de polvo o suciedad del medio ambiente.

Estos son los filtros de aceite recomendados por WIX para aumento máximo de potencia, para ser usados principalmente sobre caminos de cemento o asfalto.

**Para un rendimiento óptimo, use nuestros filtros de aceite de rendimiento avanzado con nuestros filtros de aire de rendimiento avanzado.**

# Filtros de aceite Racing WIX

Los filtros de aceite de alta eficiencia y resistencia usan un medio (T 71) que está clasificado con una eficiencia de flujo de aire Frazier de aproximadamente 2,12 m<sup>3</sup>/min (75 pies<sup>3</sup>/min). Este medio tiene un contenido de resina más alto que nuestros filtros de rendimiento avanzado para atrapar y contener contaminantes más pequeños y proporcionar una mayor eficiencia.

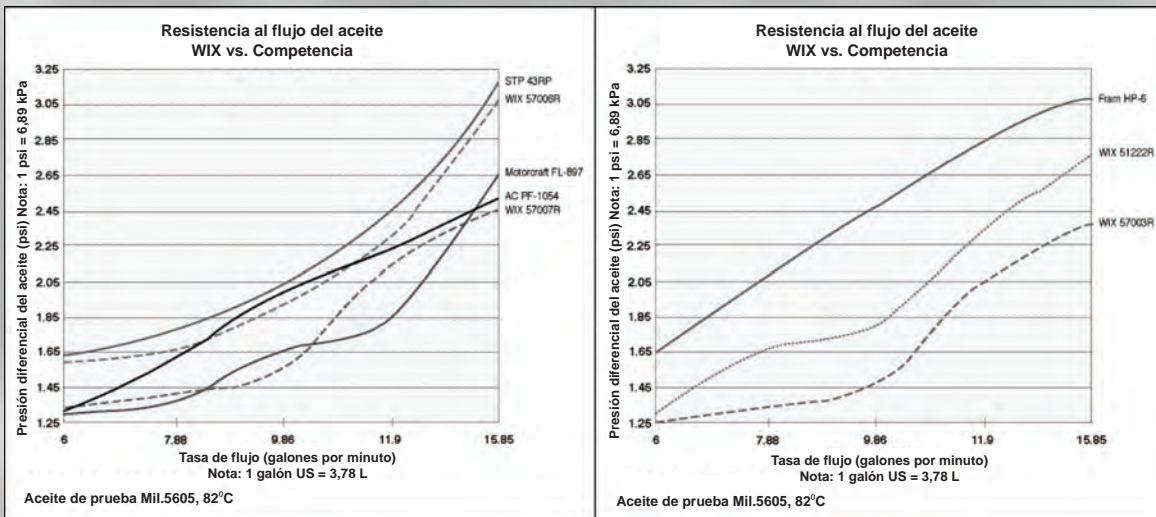

Nuestros filtros de alta eficiencia y resistencia también incluyen las mismas características de sus componentes que los filtros de rendimiento avanzado: lata resistente a alta presión de rotura, componentes de goma para altas temperaturas, placa de base con cromato de zinc, tapas de extremo metálicas y tubos centrales espiralados.

Los números de pieza de los filtros de aceite de alta eficiencia y resistencia (T 71) WIX son:

**51060R      51061R      51069R      51222R      51515R      51794R**

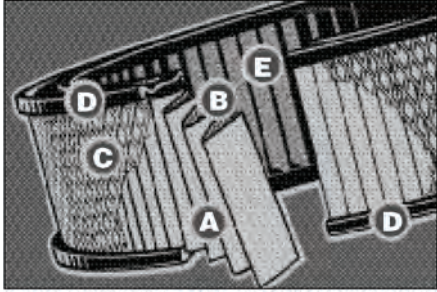

Estos son los filtros de aceite recomendados por WIX para una mejor eficiencia requerida en caminos de tierra, arcilla o no pavimentados.

Para mejor protección, use nuestros filtros de aceite de alta eficiencia y resistencia con nuestros filtros de aire de alta eficiencia y resistencia.

**Advertencia: No apto para uso en la calle.**

## Filtros de aire Racing WIX

Los **filtros de aire de rendimiento avanzado** usan un diseño único con patente en trámite. Nuestro medio **(T 66)** de gasa con refuerzo posterior de alambre **Reemay<sup>MR</sup>** permite un flujo de aire máximo mientras minimiza la restricción para incrementar la potencia. Con una eficiencia de flujo de aire Frazier de aproximadamente 11,6 m<sup>3</sup>/min (410 pies<sup>3</sup>/min), estos filtros de aire tienen la restricción más baja de todos los filtros para competencias disponibles (ver la tabla en la página siguiente).

**Los números de pieza de los filtros de aire de rendimiento avanzado (T 66) WIX son:**

<b>46940R</b>	<b>46944R</b>	<b>46945R</b>	<b>46948R</b>	<b>46949R</b>
<b>46941R</b>	<b>46928R</b>	<b>46974R</b>	<b>46927R</b>	<b>46926R</b>

### Las características adicionales del filtro de aire incluyen:

- A. El medio de alto rendimiento está diseñado para proporcionar un mayor flujo de aire.
- B. El soporte de malla de alambre en el medio de gasa (cuando se incluye) contribuye a la construcción rígida del filtro, asegurando pliegues consistentemente estables con altos volúmenes de flujo de aire.
- C. El tamiz exterior de metal expandido protege al medio del filtro y soporta la unidad del filtro.
- D. Las partes superior e inferior en plastisol moldeado aseguran un sellado positivo entre el filtro y la caja de la toma de aire.
- E. El tamiz interior de alambre de acero recubierto con resina epoxi resiste la corrosión y asegura la estabilidad del elemento filtrante.

Estos son los filtros de aire recomendados por WIX para un aumento máximo de potencia, usados principalmente en caminos de cemento o asfalto de Nextel Cup, Busch, Super Truck o ARCA.

**Para un rendimiento óptimo, use nuestros filtros de aire de rendimiento avanzado con nuestros filtros de aceite de rendimiento avanzado.**

# Filtros de aire Racing WIX

Los **filtros de aire de alta eficiencia y resistencia** usan un medio (T 88) específicamente desarrollado para filtrar los contaminantes nocivos mientras proporciona una baja restricción. Con una eficiencia de flujo de aire Frazier de aproximadamente 2,067 m<sup>3</sup>/min (73 pies<sup>3</sup>/min), este filtro de aire es ideal para vehículos para competencias Late Model, Sportsman y Modified que corren principalmente sobre caminos de tierra.

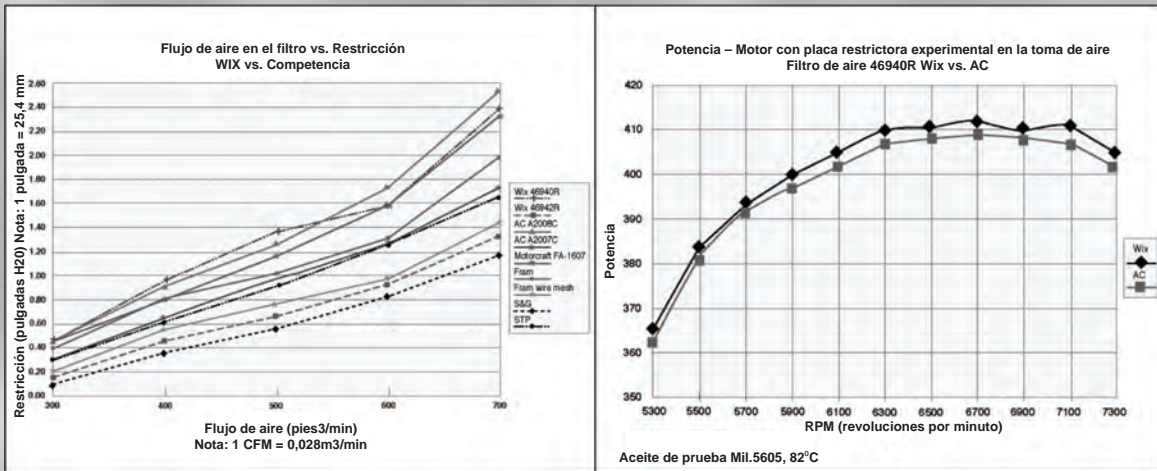

Nuestros **filtros de aire de alta eficiencia y resistencia** también poseen las mismas características de sus componentes que los **filtros de aire de rendimiento avanzado**.

**Los números de pieza de los filtros de aire de alta eficiencia y resistencia (T 88) WIX son:**

**42095R      42096R      46946R**

Estos son los filtros de aire recomendados por WIX para una mejor eficiencia requerida en caminos de tierra, arcilla o no pavimentados.

**Para mejor protección, use nuestros filtros de aire de alta eficiencia y resistencia con nuestros filtros de aceite de alta eficiencia y resistencia.**

**Advertencia: No apto para uso en la calle.**

El comprador asume todos los riesgos relacionados con el uso de este producto. Las garantías sobre nuevos vehículos y equipos quedan anuladas cuando este producto es usado en carreras competitivas o en motores modificados para alto rendimiento.

# Over Pressurized Lube Oil Filters

From time to time every filter manufacturer has had a filter that has been severely over pressurized returned from a customer. Often the deformed filter is the only sign the car owner has that a problem existed in their lube oil system.

It's possible that the damaged filter was not noticed until it was removed during the next scheduled oil change. However, if the pressure was sufficient to blow out the gasket or unroll the lockseam, the car owner may have experienced immediate and costly problems.

With the "evidence" in their hands, they tend to put the blame on the damaged filter. It's not surprising that they are more than a little aggravated when the filter manufacturer denies any responsibility for the damage. What, then, has caused the over pressurization?

A look at how a lube oil system functions will show that oil pressure is created by the oil pump. The upper limit of this pressure is controlled by a pressure regulating valve which is usually an integral part of the pump. Figure 1 is a simplified diagram of the lube oil system showing the pump, regulating valve, filter and bearings.

The pump supplies sufficient flow to lubricate the bearings and other moving parts of the engine. This oil must be under pressure if it is to properly separate the highly loaded parts of an engine and prevent excessive wear. The purpose of the regulating valve is to provide this pressure which on most passenger cars is between 40 PSI (280 kPa) and 60 PSI (410 kPa).

The regulating valve is made up of a ball or plunger which regulates pressure with the aid of a spring. The spring is calibrated so that the plunger will lift off its seat when the oil pressure reaches the desired amount. Once the valve is open, the pressure remains fairly constant with only small changes occurring as the engine speed varies.

The filter and all other components in the lube system are subjected to the pressure established by the regulating valve. If this pressure is excessive, filter damage may occur. This is the point that many people who are not familiar with lube systems fail to realize.

What can cause the pressure in the system to exceed the regulating valve setting? The answer is that either the valve must be stuck in the closed position or it is sluggish and slow to move to the open position after the engine has started.

# Over Pressurized Lube Oil Filters

Normal operating pressure causes no permanent deformation of the filter body. When the system pressure reaches 150 PSI (1,000 kPa) due to a faulty regulating valve, most filters become permanently deformed. At this pressure the gasket usually will not blow out and the lockseam will remain sound.

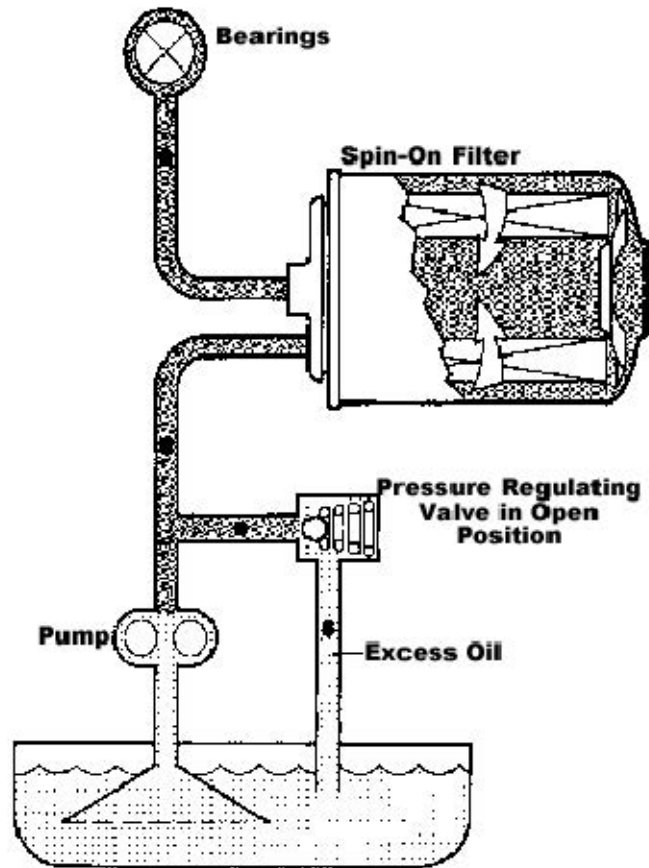

If the regulating valve still remains stuck, the pressure will increase further and the gasket between the filter and the base can be blown out. This will probably cause the loss of all the oil in the system. If the filter has been installed on the tight side, the gasket may not blow out and the lockseam will unwind as the pressure continues to rise. The main point is that the deformed filter is not the cause of this excessive pressure, but is the victim of a faulty regulating valve.

If the customer is alert and shuts the engine off at the first sign of trouble (red light on or reduced oil pressure) they can limit their loss to a tow job, oil change, new filter and oil pressure regulating valve inspection. If the vehicle continues to be driven, engine failure is probable.

The customer may ask if a plugged filter could have caused the over pressurized condition. The answer is no; if the regulating valve is functioning properly it will maintain the pressure on the filter at 40 PSI (280 kPa) or 60 PSI (410 kPa) even if the filter is plugged.

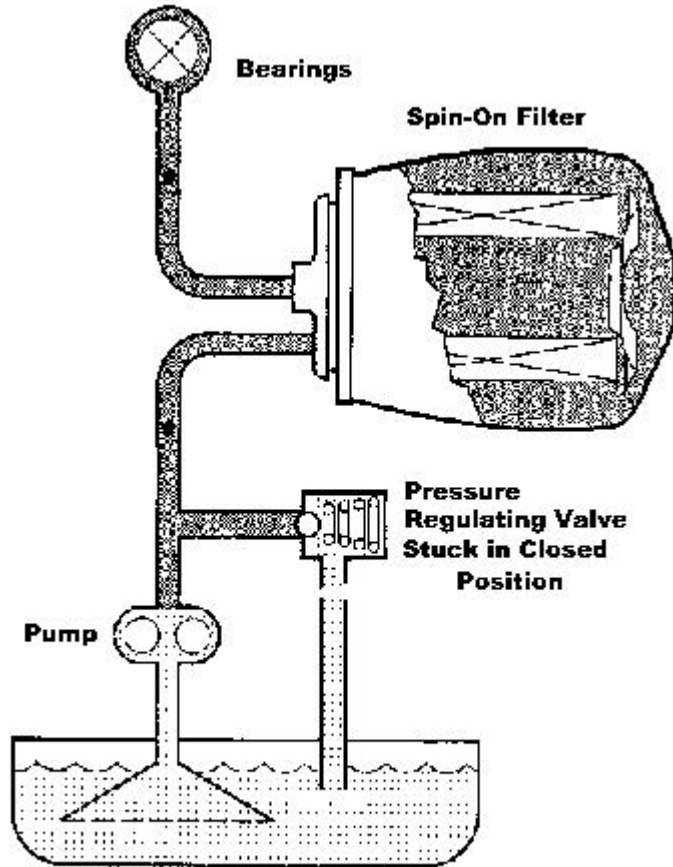

In summary, if a lube filter distorts due to excessive pressure in the system, the fault lies with the oil pump pressure regulating valve and not with the filter.

# Filtres à huile surpressurisés

De temps à autre, les fabricants de filtres reçoivent des filtres fortement surpressurisés. Souvent, le filtre déformé constitue le seul indice que le propriétaire de la voiture possède pour lui indiquer un problème dans le circuit de graissage.

Il est possible que le filtre endommagé ne soit pas remarqué avant la prochaine vidange d'huile. Si, toutefois, la pression a été suffisante pour déloger le joint ou dérouler le joint d'arrêt, le propriétaire de la voiture peut faire face à des problèmes immédiats et coûteux.

Avec la «preuve» en main, il aura tendance à accuser le filtre endommagé. Il n'est pas surprenant qu'il soit plus qu'irrité lorsque le fabricant de filtres nie toute responsabilité pour les dégâts. Alors, qu'est-ce qui a causé la surpressurisation?

Un coup d'œil sur la façon dont un circuit de graissage fonctionne démontre que la pression d'huile est engendrée par la pompe à huile. La limite la plus élevée de cette pression est contrôlée par une soupape régulatrice de pression, laquelle est normalement incorporée à la pompe. **La figure 1** constitue un schéma simplifié du circuit de graissage; on y voit la pompe, la soupape régulatrice, le filtre et les paliers.

La pompe fournit un débit suffisant pour lubrifier les paliers et autres pièces mobiles du moteur. Cette huile doit se trouver sous pression afin de séparer adéquatement les pièces lourdes du moteur et éviter une usure excessive. Le but de la soupape régulatrice est de fournir cette pression, laquelle, sur la plupart des voitures de tourisme, est de 280 à 410 kPa (40 à 60 lb/po<sup>2</sup>).

La soupape régulatrice est composée d'une bille, ou plongeur, qui contrôle la pression à l'aide d'un ressort. Le ressort est calibré de façon à permettre au plongeur de se soulever de son siège lorsque la pression d'huile atteint un niveau voulu. Une fois la soupape ouverte, la pression demeure passablement uniforme avec seulement quelques variations suivant la vitesse du moteur.

Le filtre, de même que tous les autres organes du circuit de graissage, sont soumis à la pression établie par la soupape régulatrice. Si cette pression devient excessive, le filtre peut être endommagé. Pour certaines personnes ne connaissant pas ce type de circuit, cette situation est difficile à comprendre.

# Filtres à huile surpressurisés

Quelle est la cause de cet excès de pression par rapport au réglage de la soupape régulatrice? La réponse : soit la soupape est coincée en position fermée, soit elle est lente et prend trop de temps à s'ouvrir une fois que le moteur a démarré.

**La Figure 2** illustre le circuit fonctionnant avec la soupape régulatrice coincée en position fermée. Dans ces conditions, la pression s'accumule également sur tous les organes du circuit jusqu'à ce qu'il se produise quelque chose pour dissiper la pression. Si la soupape régulatrice se décoince, la pression revient à la normale.

Une pression de fonctionnement normale ne cause aucune déformation permanente sur le corps du filtre. Lorsque la pression du système atteint 1 000 kPa (150 lb/po<sup>2</sup>) par suite d'une défektivité dans la soupape régulatrice, la plupart des filtres se déforment d'une façon permanente. À ce niveau de pression, le joint ne lâchera pas et le joint d'arrêt restera en bon état.

Si la soupape régulatrice demeure toujours coincée, la pression augmentera de plus en plus et le joint se trouvant entre le filtre et la base peut lâcher, ce qui entraînera la perte de toute l'huile dans le circuit. Si le filtre a été installé bien serré, le joint peut ne pas lâcher et le joint d'arrêt se déroulera alors que la pression continue de monter. Le point le plus important à se rappeler est que le filtre déformé n'est pas la cause de cette pression excessive, mais plutôt le résultat d'une soupape régulatrice défectueuse.

Si le client réagit rapidement et qu'il éteint le moteur au premier signe de problème (voyant rouge allumé ou pression d'huile réduite), il peut limiter les dégâts et s'en tirer avec un simple remorquage de son véhicule, une vidange d'huile et un nouveau filtre.

S'il continue de conduire la voiture, le moteur tombera probablement en panne.

Le client demandera probablement si un filtre complètement bouché peut être la cause des conditions de surpression dans le circuit. La réponse est non. Si la soupape régulatrice fonctionne adéquatement, elle maintiendra la pression au filtre à entre 280 et 410 kPa (40 et 60 lb/po<sup>2</sup>), même si le filtre est bouché.

En conclusion, si un filtre se déforme par suite d'une surpression dans le circuit, le problème provient de la soupape régulatrice et non du filtre.

# Filtros de Aceite Sobrepresurizados

De vez en cuando todos los fabricantes de filtros han recibido de algún cliente un filtro que ha sido severamente sobrepresurizado. A menudo el filtro deformado (abombado) es la única señal que el propietario del carro tiene de que existió un problema en su sistema de lubricación de aceite.

Es posible que el filtro dañado no haya sido notado hasta que fue removido del vehículo en el siguiente cambio de aceite. Sin embargo, si la presión fue suficiente como para sacar la junta del carril o desengargolar la unión del bote, el propietario del carro habrá experimentado problemas inmediatos y costosos.

Con la "evidencia" en sus manos él culpa al filtro dañado. No es de sorprenderse que esté más que un poco irritado cuando el fabricante del filtro niega o rechaza cualquier responsabilidad en el daño. Entonces, ¿Que es lo que ha causado la sobrepresurización?

Al revisar como funciona el sistema de lubricación, vemos que la presión de aceite es creada por la bomba de aceite. El límite superior de esta presión está controlado por una válvula reguladora de presión, la cual, usualmente es una parte integral de la bomba.

La figura 1 es un diagrama simplificado del sistema de lubricación que muestra la bomba, la válvula reguladora, el filtro y las chumaceras.

La bomba suministra suficiente flujo para lubricar las chumaceras y las demás partes en movimiento del motor. El aceite debe estar bajo presión para separar las partes altamente cargadas del motor y prevenir el desgaste excesivo. El propósito de la válvula es regular esta presión, que en muchos carros de pasajeros está entre 40 psi (280 kPa) y 60 psi (410 kPa).

La válvula reguladora está compuesta por una esfera o un pistón que regula la presión con la ayuda de un resorte. El resorte está calibrado de tal manera que el pistón se levante de su asiento cuando la presión del aceite alcanza el valor deseado. Una vez que la válvula está abierta, la presión se mantiene prácticamente constante, con pequeñas variaciones debidas a la velocidad de giro del motor.

El filtro y todos los demás componentes del sistema de lubricación están sujetos a la presión establecida por la válvula reguladora. Si la presión es excesiva,

# Filtros de Aceite Sobrepresurizados

puede ocurrir un daño en el filtro. Este es el punto que muchas personas que no están familiarizadas con el sistema de lubricación no toman en cuenta.

¿Que puede causar que la presión en el sistema exceda el ajuste de la válvula reguladora?. La respuesta es que la válvula debe haberse quedado pegada en posición cerrada o ésta se mueva muy lentamente a la posición de abierta después de que el motor ha arrancado.

La figura 2 muestra el sistema operando con la válvula de regulación pegada en la posición cerrada. Bajo esas condiciones la presión se incrementa igualmente en todos los componentes del sistema hasta que algo ocurre que libera la presión. Si la válvula de regulación se despega, la presión regresa a su valor normal. Si permanece pegada algo tendrá que romperse.

La presión de operación normal no causa deformaciones permanentes en el cuerpo del filtro. Cuando debido a la falla de la válvula reguladora, la presión del sistema alcanza 150 psi (1,000 kPa), la mayoría de los filtros se deforman permanentemente. A esta presión, la junta permanece en su carril y el engargolado del bote continúa sin fuga.

Si la válvula reguladora continúa pegada, la presión se incrementará y la junta entre el filtro y la base puede zafarse, esto probablemente causará la pérdida de todo el aceite del sistema.

Si el filtro se instaló muy apretado, la junta permanecerá en su lugar y el bote se desengargolará conforme la presión continúe subiendo.

Si el cliente está alerta y apaga el motor a la primera señal del problema (encendido de la luz roja o baja presión de aceite en el indicador), limitará su pérdida a un trabajo arrastre al taller, cambio de aceite y un filtro nuevo.

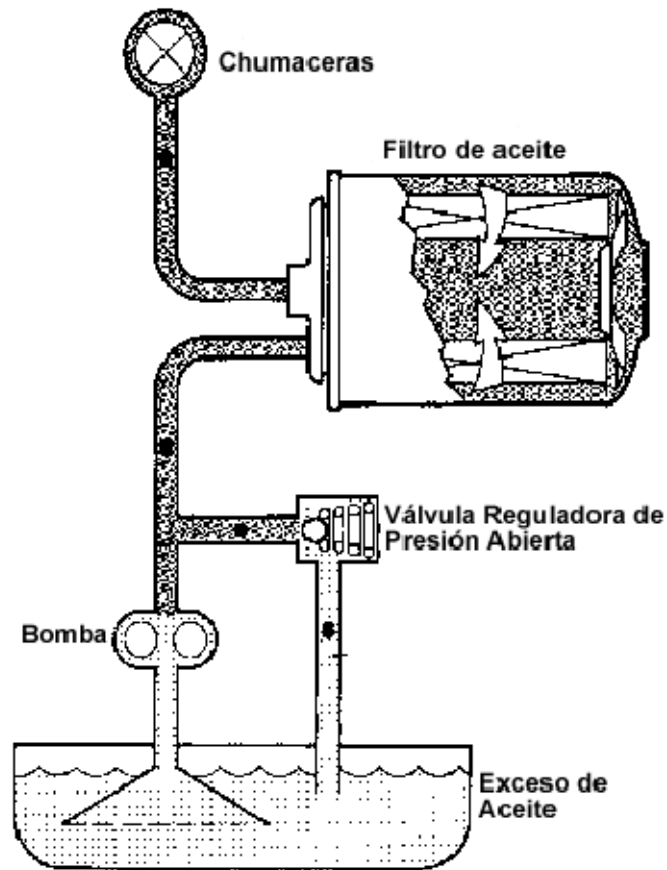

Si él continua la marcha hasta el taller más cercano, probablemente quemará el motor debido a la falta de aceite.

El punto principal es que el filtro deformado no es la causa de la presión excesiva, sino la víctima de una válvula reguladora defectuosa.

El cliente pudiera preguntar si un filtro completamente tapado puede causar las condiciones de sobrepresión en el sistema. La respuesta es no. Si la válvula reguladora está funcionando adecuadamente, ésta mantendrá la presión en el filtro a 40 psi (280 kPa) o 60 psi (410 kPa) aún si el filtro estuviera tapado.

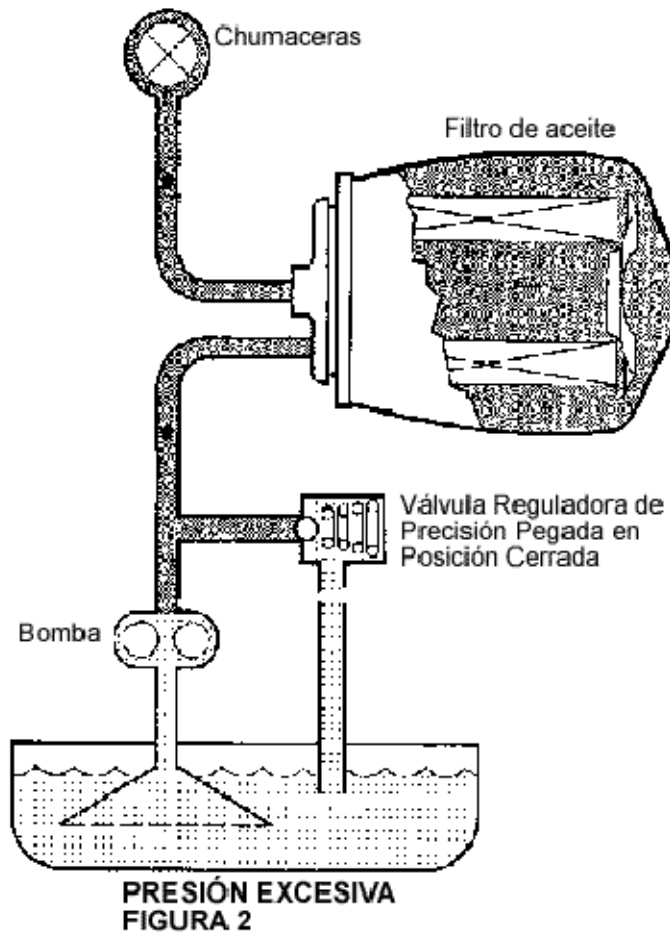

En resumen, si un filtro se deforma debido a la sobrepresión en el sistema, la falla está en la válvula reguladora de presión y no en el filtro.

# Manufacturers' Warranty

Consumer purchasers of filters are sometimes told that an aftermarket brand of replacement filter cannot be used in the consumer's vehicle during the warranty period. The claim is made that use of an aftermarket brand will "void the warranty," with the statement or implication that only the original equipment brand of filters may be used. This tends to cast doubt on the quality of the aftermarket filter.

That claim is simply not true. If the consumer asks for the statement in writing, they will not receive it. Nevertheless, the consumer may feel uneasy about using replacement filters that are not original equipment. With the large number of consumers who prefer to use an aftermarket filter this misleading statement should be addressed.

Under the federal Magnuson-Moss Warranty Act, the Clean Air Act and general principles of the U.S. Federal Trade Commission Act, a manufacturer may not require the use of any brand of filter (or any other article) unless the manufacturer provides the item free of charge under the terms of the warranty.

If the consumer is told that only the original equipment filter will not void the warranty, they should request that the OE filter be supplied free of charge. If they are charged for the filter, the manufacturer may be violating the Magnuson-Moss Warranty Act or other applicable law.

By providing this information to consumers, the members of the Filter Manufacturers Council (FMC) intend to combat the erroneous claim that the use of a brand of replacement filter other than original equipment will "void the warranty."

It should be noted that the Magnuson-Moss Warranty Act is a U.S. federal law that applies to consumer products. The U.S. Federal Trade Commission has authority to enforce the Magnuson-Moss Warranty Act, including obtaining injunctions and orders containing affirmative relief. In addition, a consumer can bring suit under the Magnuson-Moss Warranty Act.

# Garantie du fabricant

Il arrive parfois chez un concessionnaire automobile qu'un préposé à la clientèle ou un mécanicien dise aux acheteurs de filtres d'automobiles de ne pas utiliser une certaine marque de filtre de rechange sur leur véhicule pendant la période de garantie, à l'effet que l'utilisation de cette marque «annulera la garantie», signifiant ou insinuant ainsi que seul l'emploi de la marque de filtre de l'équipement d'origine est acceptable. Il va sans dire que cette affirmation est de nature à semer le doute sur la qualité des filtres de rechange.

En fait, cette affirmation est tout simplement fausse. Si le consommateur en demandait une version écrite, il n'en recevrait aucune. Cependant, il peut se demander s'il fait un mauvais choix en utilisant des filtres de rechange qui ne sont pas de l'équipement d'origine. Comme il y a nombre élevé de bricoleurs qui préfèrent poser leurs propres filtres, cette affirmation erronée doit être rectifiée.

Selon la loi sur la garantie Magnuson-Moss Warranty Act et les principes généraux de la U.S. Federal Trade Commission Act, un fabricant ne peut exiger l'utilisation d'une marque de filtre quelconque (ou d'un autre article) à moins d'offrir cet article gratuitement en vertu de la garantie.

Donc, si le consommateur se fait dire que seul le filtre d'équipement d'origine n'annulera pas la garantie, il devrait exiger que ce filtre d'équipement d'origine lui soit offert gratuitement. Si on lui demande de payer ce filtre, le fabricant devient alors en infraction à la loi sur la garantie Magnuson-Moss ou à une autre loi qui s'applique.

En fournissant ce renseignement aux consommateurs, le Conseil des fabricants de filtres désire aider à combattre l'affirmation mensongère qu'une marque de filtre de rechange autre que celle offerte sur l'équipement d'origine «annule la garantie».

Il est important de noter que la loi sur la garantie Magnuson-Moss est une loi fédérale américaine concernant les produits de grande consommation. La U.S. Federal Trade Commission est habilitée à appliquer la loi sur la garantie Magnuson-Moss, y compris à demander des injonctions ou des ordonnances dans lesquelles il y a des mesures réparatrices. De plus, un consommateur peut entamer des poursuites en vertu de la loi sur la garantie Magnuson-Moss.

# Garantías de los Fabricantes

Algunas veces, los jefes del departamento mecánico o de servicio de las agencias les dicen a los consumidores que compran filtros automotrices, que no puede usarse, en el vehículo del consumidor, una marca de reemplazo durante el período de garantía. La exigencia es hecha en el sentido de que el uso de tal marca "anulará la garantía" y con la implicación de que sólo la marca original puede ser usada. Esto, por supuesto, tiende a sembrar una duda acerca de la calidad del filtro de reemplazo.

Esto simplemente no es cierto. Si el consumidor pide esto por escrito no lo recibirá. No obstante, el consumidor pudiera no sentirse a gusto al usar filtros de reemplazo que no sean marca original. Con el gran número de consumidores que prefieren hacer ellos mismos el cambio de filtros, esta engañosa exigencia debe ser aclarada.

Bajo el Acta de Garantías Magnuson-Moss y los principios generales del Acta de la Comisión Federal de Comercio, un fabricante no puede exigir el uso de cualquier marca de filtro (o cualquier otro artículo) a menos que el fabricante proporcione el artículo libre de cargo bajo los términos de la garantía.

De esta forma, si al consumidor se le dice que sólo el uso del filtro original no anulará la garantía, él debe exigir que el filtro original sea suministrado sin costo. Si a él se le cobra el filtro, el fabricante del vehículo estará violando el Acta de Garantías Magnuson-Moss u otras leyes aplicables.

Al proporcionar esta información a los consumidores, el FMC puede ayudar a combatir la errónea exigencia de que un filtro de reemplazo, diferente al original, "anulará la garantía".

Debe hacerse notar, que el Acta de Garantías Magnuson-Moss es una ley federal que aplica a productos de consumo. La Comisión Federal de Comercio tiene la autoridad para hacer cumplir el Acta de Garantías Magnuson-Moss, incluyendo la liberación de órdenes. Además, un consumidor puede solicitar un juicio amparado en el Acta de Garantías Magnuson-Moss.

# Limited Warranty

## FILTERS

Any vehicle and equipment warranties you may have are not affected by proper use of NAPA filters.

MANN+HUMMEL Filtration Technology US LLC ("we") warrants your NAPA filter to be free from defects in materials and workmanship during the Warranty Period. The "Warranty Period" is the service interval for filter replacements recommended by the manufacturer of the engine or equipment. If your filter is found to be defective during the Warranty Period, we will, at our sole discretion, replace it with another NAPA filter and/or reimburse you for the reasonable costs of the parts and labor required to repair your engine or equipment to the extent the damage is solely attributable to the defective filter.

If your application is not listed in the NAPA Filters catalog, this limited warranty applies ONLY if your filter is a valid cross-reference to the proper OEM filter as listed in the [napafilters.com](http://napafilters.com) online filter lookup, the printed catalog or its electronic copy. It is your responsibility to determine the proper OEM filter for your application and the correct NAPA cross reference to the OEM filter in the online filter lookup. We reserve the right to examine the filter, engine and/or equipment to verify the applicability of the cross-referenced OEM filter.

## NON-FILTER PRODUCTS

Products other than filters are warranted to be free from defects in materials and workmanship for a period of one (1) year from the date of purchase.

## WARRANTY SERVICE

To obtain warranty service, you must, within 30 days after discovery of damage, submit a claim to any NAPA Filters representative, your NAPA Filters distributor or directly to the address below. We reserve the right to examine the filter, engine and/or equipment to determine the extent of damage and whether it was caused by a defective NAPA filter. We also reserve the right to examine any applicable service records, installation records, and receipts.

## CONDITIONS

For filters, this limited warranty DOES NOT COVER:

- Filters submitted in a condition that prohibits evaluation and testing, such as a filter that has been deconstructed, disassembled or cut open;
- Use of the filter on an incorrect, non-approved or non-recommended application;
- Use of the filter in competitive racing, on modified high-performance engines, or on any aircraft or aviation application;
- Damage or failure caused by improper installation, misuse, modification, accidents or abuse;
- Use of motor oil other than the viscosity and type as recommended by the manufacturer of the engine or equipment;
- Costs of repairs not directly attributable to the defective filter;
- Towing fees, rental car fees, or any other fees, expenses, damages, costs or losses that are not specifically provided for in this Limited Warranty.

For products other than filters, this limited warranty DOES NOT COVER damage caused by:

- Improper installation, misuse, negligence, modification, accidents or abuse;
- Failure to follow the product instructions;
- Normal wear and tear.

THIS WARRANTY IS EXCLUSIVE OF ANY OTHER WARRANTY, EXPRESS OR IMPLIED. THE REMEDIES DESCRIBED ABOVE ARE YOUR SOLE AND EXCLUSIVE REMEDIES AND OUR ENTIRE LIABILITY FOR ANY BREACH OF THIS LIMITED WARRANTY. UNDER NO CIRCUMSTANCES SHALL WE BE LIABLE FOR ANY SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES WHATSOEVER, INCLUDING CLAIMS FOR LOSS OF USE OF THE ENGINE OR EQUIPMENT ON WHICH THE FILTER IS INSTALLED, LOSS OF TIME, INCONVENIENCE OR COMMERCIAL LOSS. WE LIMIT THE DURATION AND REMEDIES OF ALL IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, TO THE DURATION OF THIS EXPRESS LIMITED WARRANTY. FOR FILTERS USED IN COMMERCIAL APPLICATIONS, AND EXCEPT WHERE PROHIBITED BY APPLICABLE LAW, WE EXPRESSLY DISCLAIM, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

Some states and other local jurisdictions do not allow limitations on the duration of implied warranties or the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state and other local jurisdictions.

Our NAPA Filters Limited Warranty shown above does not apply to NAPA industrial filters, WIX Racing™, ecoLAST®, AquaChek® or products sold in China or Mexico.

Warranties for these products, as well as the Spanish and French translations, can be viewed at <http://napafilters.com/warranty>.

For more information contact your District Sales Manager or the call the Product Information Team at the phone number listed at the beginning of this catalog.

# GARANTIE LIMITÉE

## FILTRES

Toute garantie de véhicule et d'équipement dont vous pourriez bénéficier n'est pas affectée par l'utilisation appropriée des filtres NAPA.

MANN+HUMMEL Filtration Technology US LLC (« nous ») garantit que votre filtre NAPA est exempt de défaut de matériaux et de fabrication pendant la Période de garantie. La « Période de garantie » est l'intervalle de temps de service recommandé par le fabricant du moteur ou de l'équipement pour le remplacement du filtre. Si votre filtre s'avère défectueux pendant la Période de garantie, nous – à notre seule discrétion – le remplacerons par un autre filtre NAPA et/ou vous rembourserons les coûts raisonnables des pièces et de la main-d'œuvre nécessaires pour réparer votre moteur ou votre équipement dans la mesure où le dommage est attribuable exclusivement au filtre défectueux.

Si votre utilisation ne figure pas dans le catalogue de NAPA Filters, cette garantie limitée s'applique UNIQUEMENT si votre filtre est un équivalent valide du filtre FEO approprié selon le répertoire de filtres disponible en ligne sur [napafilters.com](http://napafilters.com), dans le catalogue imprimé ou dans sa copie électronique. Il est de votre responsabilité de déterminer le filtre FEO approprié pour votre utilisation et

## AUTRES PRODUITS

Les produits autres que les filtres sont garantis contre tout défaut de matériaux et de fabrication pendant une période d'un (1) an à compter de la date d'achat.

## SERVICE SOUS GARANTIE

Pour obtenir un service sous garantie, vous devez, dans les 30 jours suivant la découverte du dommage, soumettre une réclamation auprès d'un représentant de NAPA Filters, de votre distributeur NAPA Filters ou directement à l'adresse ci-dessous. Nous nous réservons le droit d'examiner le filtre, le moteur et/ou l'équipement pour déterminer l'étendue du dommage et si celui-ci a été causé par un filtre NAPA défectueux. Nous nous réservons également le droit d'examiner tout dossier de services, tout dossier d'installation et tout reçu applicable.

## CONDITIONS

Pour les filtres, cette garantie limitée NE COUVRE PAS :

- Les filtres remis dans un état qui empêche d'en faire l'évaluation et le test, tel qu'un filtre qui a été déconstruit, désassemblé, coupé ou ouvert;
- L'usage du filtre dans le cadre d'une utilisation incorrecte, non approuvée ou non recommandée;
- L'usage du filtre dans le cadre de courses de compétition, sur des moteurs à haute performance modifiés, ou sur des aéronefs ou à des fins d'aviation;
- Le dommage ou la défaillance causés par une installation incorrecte, une mauvaise utilisation, une modification, un accident ou un abus;
- L'utilisation d'une huile à moteur dont la viscosité et le type diffèrent des recommandations du fabricant du moteur ou de l'équipement;
- Les coûts de réparation qui ne sont pas directement attribuables au filtre défectueux;
- Les frais de remorquage, de location de voiture, ou tout autres frais, dépenses, dommages, coûts ou pertes qui ne sont pas spécifiquement prévus par la présente Garantie limitée.

Pour les produits autres que les filtres, cette garantie limitée NE COUVRE PAS le dommage causé par:

- Une installation incorrecte, une mauvaise utilisation, une négligence, une modification, un accident ou un abus;
- Le non-respect des instructions du produit;
- L'usure normale.

CETTE GARANTIE EST EXCLUSIVE DE TOUTE AUTRE GARANTIE, EXPRESSE OU IMPLICITE. LES RECOURS DÉCRITS CI-DESSUS SONT VOS SEULS ET UNIQUES RECOURS ET NOTRE ENTIÈRE RESPONSABILITÉ POUR TOUTE VIOLATION DE CETTE GARANTIE LIMITÉE. NOUS NE SERONS RESPONSABLES EN AUCUN CAS DE DOMMAGES SPÉCIAUX, INCIDENTS OU INDIRECTS DE QUELQUE NATURE QUE CE SOIT, Y COMPRIS LES RÉCLAMATIONS POUR PERTE D'UTILISATION DU MOTEUR OU DE L'ÉQUIPEMENT SUR LEQUEL LE FILTRE EST INSTALLÉ, PERTE DE TEMPS, DÉSAGRÈMENT OU PERTE COMMERCIALE. NOUS LIMITONS LA DURÉE DE TOUTE GARANTIE IMPLICITE ET LES RECOURS QUI EN DÉCOULENT, Y COMPRIS, SANS LIMITATION, LES GARANTIES DE QUALITÉ MARCHANDE ET D'ADÉQUATION À UN USAGE PARTICULIER, À LA DURÉE DE LA PRÉSENTE GARANTIE LIMITÉE EXPRESSE. POUR LES FILTRES UTILISÉS À DES FINS COMMERCIALES, ET SAUF SI LA LOI APPLICABLE L'INTERDIT, NOUS DÉCLINONS EXPRESSÉMENT, SANS LIMITATION, LES GARANTIES IMPLICITES DE QUALITÉ MARCHANDE ET D'ADÉQUATION À UN USAGE PARTICULIER.

Certains états et d'autres juridictions locales interdisent la limitation de la durée des garanties implicites ou l'exclusion ou la limitation des dommages incidents ou indirects, de sorte que les limitations ou exclusions ci-dessus peuvent ne pas s'appliquer à vous. Cette garantie vous donne des droits légaux spécifiques et vous pouvez également avoir d'autres droits qui varient selon l'état et la juridiction locale.

Notre Garantie limitée NAPA Filters présentée ci-dessus ne s'applique pas aux produits filtres industriels de NAPA, WIX Racing™, ecoLAST®, AquaChek® ou aux produits vendus en Chine ou au Mexique. Les garanties relatives à ces produits, ainsi que les traductions en espagnol et en anglais, peuvent être consultées sur le site <http://napafilters.com/warranty>. Pour plus d'informations, contactez votre Directeur régional des ventes ou l'Équipe d'information sur les produits au numéro de téléphone indiqué au début de ce catalogue.

# GARANTÍA LIMITADA

## FILTROS

Cualquier garantía de vehículos y equipos que pueda usted tener no se verá afectada por el uso adecuado de filtros NAPA.

MANN+HUMMEL Filtration Technology US LLC ("nosotros") garantiza que sus filtros NAPA están libres de defectos en materiales y mano de obra durante el Período de Garantía. El "Período de Garantía" es el intervalo de los servicios para llevar a cabo los reemplazos de filtros recomendados por el fabricante del motor o equipo. Si durante el Período de Garantía se determina que su filtro es defectuoso, a nuestro exclusivo criterio lo reemplazaremos por otro filtro NAPA y/o le reembolsaremos los costos razonables de las piezas y la mano de obra necesarios para reparar su motor o equipo en la medida en que el daño sea atribuible únicamente al filtro defectuoso.

Si su aplicación no figura en el catálogo de Filtros NAPA, esta garantía limitada SOLAMENTE aplica si su filtro es una referencia cruzada válida al filtro-OEM adecuado de acuerdo a la lista en el buscador de filtros en línea en [napafilters.com](http://napafilters.com), en el catálogo impreso o su copia electrónica. Es su responsabilidad determinar el filtro-OEM adecuado para su aplicación y la correcta referencia cruzada a NAPA en el buscador de filtros en línea. Nos reservamos el derecho de examinar el filtro, el motor y / o el equipo para verificar la aplicabilidad del filtro-OEM con referencia cruzada.

## PRODUCTOS DISTINTOS A FILTROS

Los productos que no sean filtros están garantizados contra defectos de materiales y mano de obra durante un período de un (1) año a partir de la fecha de compra.

## SERVICIO DE GARANTÍA

Para obtener el servicio de garantía, usted deberá presentar la reclamación al representante de Filtros NAPA, a su distribuidor de Filtros NAPA o directamente a la dirección indicada abajo, dentro de los 30 días posteriores al descubrimiento del daño. Nos reservamos el derecho de examinar el filtro, el motor y/o el equipo para determinar la extensión del daño y si éste fue causado por un filtro NAPA defectuoso. También nos reservamos el derecho de examinar los correspondientes registros de servicios, registros de instalación y recibos.

## CONDICIONES

Para los filtros, esta garantía limitada NO CUBRE:

- Filtros presentados en condiciones que impidan la evaluación y las pruebas, como podría ser un filtro que se ha deconstruido, desmontado o cortado para abrirlo;
- Uso del filtro en una aplicación incorrecta, no aprobada o no recomendada;
- Uso del filtro en carreras, en motores modificados de alto rendimiento o en cualquier aeronave o aplicación de aviación;
- Daños o fallas causados por instalación incorrecta, mal uso, modificación, accidentes o abuso;
- Uso de aceite de motor que tenga una viscosidad y tipo distintos a los recomendados por el fabricante del motor o equipo;
- Costos de reparaciones no directamente atribuibles al filtro defectuoso;
- Gastos de remolque, tarifas de alquiler de automóviles o cualquier otro honorario, gasto, daño, costo o pérdida que no estén específicamente previstos en esta Garantía Limitada.

Para productos distintos a los filtros, esta garantía limitada NO CUBRE daños causados por:

- Instalación inadecuada, mal uso, negligencia, modificación, accidentes o abuso;
- No seguir las instrucciones del producto;
- Uso y desgaste normal.

ESTA GARANTÍA EXCLUYE CUALQUIER OTRA GARANTÍA, EXPRESA O IMPLÍCITA. LOS RECURSOS ANTES DESCRITOS SON SUS ÚNICOS Y EXCLUSIVOS RECURSOS Y NUESTRA RESPONSABILIDAD TOTAL POR CUALQUIER INCUMPLIMIENTO DE ESTA GARANTÍA LIMITADA. BAJO NINGUNA CIRCUNSTANCIA SEREMOS RESPONSABLES DE CUALQUIER DAÑO ESPECIAL, INCIDENTAL O CONSECUENCIAL, INCLUYENDO RECLAMACIONES POR PÉRDIDA DE USO DEL MOTOR O EQUIPO EN EL QUE ESTÁ INSTALADO EL FILTRO, PÉRDIDA DE TIEMPO, INCONVENIENCIA O PÉRDIDA COMERCIAL. LIMITAMOS LA DURACIÓN Y LOS RECURSOS BAJO TODAS LAS GARANTÍAS IMPLÍCITAS, INCLUYENDO SIN LIMITACIÓN LAS GARANTÍAS DE COMERCIALIZACIÓN Y APTITUD PARA UN PROPÓSITO PARTICULAR, A LA DURACIÓN DE ESTA GARANTÍA LIMITADA EXPRESA. PARA LOS FILTROS UTILIZADOS EN APLICACIONES COMERCIALES, Y EXCEPTO QUE ESTÉ PROHIBIDO POR LA LEY APLICABLE, RECHAZAMOS EXPRESAMENTE, SIN LIMITACIÓN, LAS GARANTÍAS IMPLÍCITAS DE COMERCIALIZACIÓN Y APTITUD PARA UN PROPÓSITO PARTICULAR.

Algunos estados y otras jurisdicciones locales no permiten limitaciones a la vigencia de garantías implícitas o la exclusión o limitación de daños incidentales o consecuenciales, por lo que las limitaciones o exclusiones anteriores podrían no ser aplicables para usted. Esta garantía le otorga derechos legales específicos y también podría tener otros derechos que varían de un estado a otro y otras jurisdicciones locales.

Nuestra Garantía Limitada NAPA Filters señalada arriba no aplica para filtros industriales NAPA, WIX Racing™, ecoLAST®, AquaChek® o productos vendidos en China o México. Las garantías para dichos productos, así como sus traducciones al español y francés, pueden consultarse en <http://napafilters.com/warranty>. Para obtener más información, comuníquese con su Gerente de Ventas de Distrito o llame al Equipo de Información de Productos al número telefónico señalado al principio de este catálogo.
