

NAPA 3976 FUEL FILTER

After extensive testing and research, NAPA Filters is proud to offer the new NAPA 3976 fuel filter for 1992-2002 Chevrolet-GMC trucks and vans with the 6.5L diesel engine as well as the 1993-2004 Hummer. This upgraded design replaces the previous NAPA 3976. The new NAPA 3976 fuel filter features many benefits over previous and competitive designs.

The NAPA 3976 features one-piece, all plastic, environmentally-friendly container, which is both rust proof and water proof. This all-plastic design, only from NAPA, will not dent, due to increased durability and shell strength, and the plastic provides 100% corrosion protection. Competing diesel fuel filters made of metal are susceptible to rust and corrosion, particularly with today's ULSD fuels. Because ULSD and biofuels are prone to water absorption, that water must be stripped and contained by the filter, which can cause eventual corrosion in a metal filter can.

The NAPA 3976's one piece container design includes a molded threaded collar, which eliminates the risk of leakage when compared to competing designs that feature a threaded retainer ring that mates with the metal filter lid. The NAPA 3976 also features a lathe cut gasket which fits into a gasket groove in the lid, versus a two-part seal and retainer clip in competing designs.

NAPA Design

In addition to more durability and better performance, the upgraded design of the NAPA 3976 offers the installer an easier installation and removal process. Easier installation and removal is achieved through a combination of the one piece container and the lathe cut gasket. The patented QuickVent self-venting valve technology simplifies draining, provides a handle for easier use, and a retainer clip to eliminate dropped valves.

The new NAPA 3976 has outperformed the competition in cycle fatigue and burst testing in field trials and laboratory environments, beats the competition in durability and reliability, and provides technicians with an easier filter to work with during installation and removal.
