

HEAVY DUTY

7791 Introduced to Meet Changing Customer Needs

At NAPA Filters we are dedicated to the ongoing improvement of our product offerings, and are pleased to announce the addition of our 7791 to meet the changing needs of today's diesel engines.

The 7791 joins a team that includes the 1791, 1791XD and 1791XE. While these filters are dimensionally similar, it is what's on the inside that counts. Each of these products offers a combination of application engineered components that are designed to meet a bevy of needs.

Specifically, the 7791 offers a proprietary media blend that is designed to handle the challenges today's operating conditions present, and is recommended as a direct replacement for the Caterpillar® 1R1807. As always, check the most current application recommendations to see which filter is the right choice for you.

This product reflects an ongoing product strategy that focuses on innovation and continuing product improvement.
